

Education Calendar

HARTMANN's Professional Development Program offers unparalleled educational support for our customers by offering the most extensive range of educational courses and a wide range of educational options, including e-learning, accredited courses, face to face modules and open education days.

Open education days are focused on popular education topics and are run at various locations across the country. They are suitable for Health Care Professionals who are interested in extending their woundcare and incontinence knowledge yet who do not have access or are unable to attend education sessions within their aged care or hospital facilities.

This Education Calendar offers the Open Education Day program for 2010. If you wish to attend any of these sessions, please contact your local HARTMANN representative or the HARTMANN Education Department.
